

## HGQ – Flat Fan Sphere

### FLAT FAN SPHERE NOZZLES

HGQ and RGN plastic swivel ball nozzles are designed for diversified applications. They allow an easy adjustment of their spray jet direction and offer a quick-fit connection.

HGQ flat fan nozzles feature a 60° spray angle and their wide range of flow rates makes them the best choice in pre-treatment plants. For an easier identification and use, they are made in different colors depending on the flow rate.

The material is top quality PP, chemically bonded fibreglass to offer the best stability at high temperatures and resistance to chemicals.

#### Characteristics

- **Spray angle:** 60°.
- **Capacity:** 2.3- 23.7L/m.
- **Material:** Glass Filled PP.

#### Typical applications:

- ✓ cleaning,
- ✓ surface pre-treatment lines.
