

## VAE – Blanking Cap

### PLASTIC END CAPS

VAE plastic caps are used to close pipes ends. 1 1/4" VAE 1250 D6 plastic caps can be used to seal pipes ends when, to manufacture different size products, it's necessary to reduce the quantity of swivel nozzles. They are made of high quality PP or chemically bonded fibreglass to keep stability at high temperatures and offer the best resistance to chemicals. They are widely used in surface pre-treatment.

#### Characteristics

- **Size:** 1 1/4".
- **Body:** Glass Filled PP.

#### Typical application

- ✓ Blanking pipes and clamps.
