

VEH – Plastic Body Filters

PLASTIC BODY FILTERS

VEH filters with plastic body are a rational and economic solution for most operating environments. The threaded coupling between bowl and head allows a quick filter cleaning and easy replacement of the cartridge and no need of tools. They have a high particles retention and are durable.

Characteristics

- **Thread size:** 1/2" - 1 1/2".
- **Mesh size:** 32, 50, 100.
- **Body:** POLYPROPYLENE.
- **Screen:** AISI 304.
- **Seal:** EPDM.

Typical application

- ✓ Filtering before spraying liquids.
