

ZPF – Swivel Clamps

SWIVEL NOZZLE CLAMPS

ZPF swivel clamps are specially designed for HGQ, RGN and ZBA series. To install them on pipes all you need is drill a hole, insert the nozzle clamp inside and fasten it with a simple screwdriver. The nozzle clamp body is in PP chemically bonded fibreglass whereas accessorial bolts and screws are made in stainless steel AISI 316. They are robust, easy to install, adjust and service and their design revolutioned modern surface pre-treatment plants. They provide excellent performance at high temperatures and easy spray jet orientation.

Characteristics

- **Pipe size:** 1 1/4" - 1 1/2".
- **Material:** Glass Filled PP.
- **Pins:** AISI 316.
- **O'ring:** NBR.

Typical applications

- ✓ Cleaning,
- ✓ surface pre-treatment lines.
